PROJECTS

TypeFitnessMobile

10/2023 - 11/2023

<https://github.com/teoMarinov/typeFitnessMobile>

Core functionality of Typescript-Fitness made with React Native for phones.

- Technologies: React Native, Expo, Firebase,

Workout tracker remastered - Typescript-Fitness

Present

<https://typescript-fitness-32ac0.firebaseio.com>

I am remaking my previous project, due to not being happy with the result

- Using TypeScript instead of JavaScript
- Better design
- Cleaner code
- Technologies: React.ts, Firebase, Chakra UI, TypeScript

Workout tracker

05/2023 - 06/2023

https://gitlab.com/zooM024/final-project-workout-app/-/commits/main?ref_type=heads

Easy to use app that allows its users to log their daily performance as well as track their diet

- You can track how much weight and how many reps you did each set
- You can check on your logs later on true a calendar menu
- You can save the nutrition values on the foods you eat and then combine them to get the nutrition value for any meal you do, easily calculating you daily and weekly calories intake
- Technologies: React.js, Node.js, Firebase

STRENGTHS

Good communicator

I am good with communicating with other people. Furthermore, I can approach conversations in different ways depend on with who I am speaking with.

Adaptable

I can adapt to both light-hearted and serious working environments. Furthermore, I can also do my tasks and follow guidelines or if necessary take more proactive role.

Creative

I can come up with many ideas on the spot. When we were discussing what our final project should look like I kept on coming with ideas until we finally found something we all liked.

PASSIONS

Self-improvement

I love self-improvement because it helps me feel better during the day

Fitness

Gaming

SKILLS

JavaScript

TypeScript

HTML

CSS

React

React Native

Chakra UI

Node.js

Firebase

LANGUAGES

Bulgarian
